RECEIVERS DELAY **8-CENT FARE PLEA** TO CITY OFFICIALS

No Explanation Given for Their Non-Appearance Before the Estimate Board.

the application by receivers of trac tion companies for an 8-cent fare to the Board of Estimate. Attorney for the interested parties refused make any comment and Federa Judge Julius Mayer, who authorized the application, declared he would not discuss the matter.

The failure of the receivers to file the application to-day is indicative that the 8-cent fare proposal will not be aired before the Board of Estimate next Friday, as the requirements make mandatory that such application must be in the hands of the Board on the Tuesday before the date of the meeting

KEEP CARS RUNNING ON STATEN ISLAND

Both Companies Agree to Maintain Service Till Jan. 19-Public

Hearing Friday. The officers of the two Staten Island trolley companies to-day promised to postpone for nine days their threatened of stopping on next Saturday, will run until Jan. 19.

that date is still a question. When the companies told Public Service Commissioner Nixon that they wanted to quit on Jan. 10, a committee of citizens appealed to the Board of Estimate to prevent the loss of service. The hearing on this appeal will be on Friday, and mmissioner Nixon to give the Board Betimate a reasonable time in which

companies say they positively uit on the 19th unless relief is in reply to the protest that the would suffer, the bompanies to Borough President Van Name's sent that he is prepared to run

Coal Situation in Vienna Acute. Transponiation delays are making the coal situation in Vienna daily more acute, according to advices from the French Mission in that city. Entente trains, intended to relieve the shortage, have been held up by heavy snowfalls. Three thousand French cars are being sent to Czecho-Slovakia, in order to haure delivery of coal to Austria.

The RISE of MAXWELL

IX years ago the Maxwell Motor Company was only an idea. Now it is doing a volume of about \$100,000,000 per year.

Noted minds and notable methods have accelerated its success; but its rise, like the story of any big business growth, lies in the product it makes.

Money will not buy a better crankshaft for its purpose than the one you find in a Maxwell engine.

Nor will money buy better gears, better bearings, a better frame or better axles for the purposes intended.

Picture in your mind the terrific use they get. The combined mileage of 300,000 Maxwells per year is close to 1,500,000,000. This denotes the great test that the Maxwell undergoes each year.

How well it survives this great test figures speak plainer than words-300,000 in 6 years have been built; 100,000 for the current year.

The rise of Maxwell, therefore, has been as certain as the rising of the sun.

The Maxwell you see at the Automobile Show is not only a better looking Maxwell, but a better Maxwell. It is a Post-War car. It has many improvements.
